

**Steve Verryn** obtained his MSc in Quantitative Genetics and his PhD in Quantitative Genetics at the University of Pretoria. Since June 2011, he has been an Extraordinary Professor at the Forest and Biotechnology Institute at the University of Pretoria. He is also an Associate of several local and overseas organisations.

He was responsible for Gladiolus breeding at the Agricultural Research Council (previously VOPRI) from 1985 to 1988. He then participated as a geneticist in a dog breeding programme focusing on hip dysplasia in German Shepherd dogs at Roodeplaat Breeding Enterprises. In 1994 he joined the CSIR and built a team of 18 tree breeders during his 20 years with the institution.

Steve has served as a consultant, external reviewer and examiner to various scientific bodies, companies and universities in South Africa, Africa, Australia, New Zealand, South America, India and the United Kingdom.

**"NORMAL  
IS EXTINCT"**

He has presented and co-presented courses on Tree Breeding, quantitative genetics, and data analysis in Portugal, Australia, India, Tanzania, Kenya and South Africa, with attendees from over 30 countries.
